Education

Sahyadri College of Engineering & Management

Bachelor of Engineering in Electronics & Communication Engineering CGPA: 8.44/10

Mangalore, KA

Nov 2022 – Present

KLES Independent SC PU College

Pre-University Education (PCMC) Aggregate: 83%

Gangavathi, KA

Aug 2020 – Mar 2022

Work Experience

Software Development Intern – JSpiders

Full Stack Java Development Training Program

Bangalore, India

Jan 2026 – Present

- Developing full-stack application skills using Core Java, Advanced Java (JDBC, Spring Boot), SQL, HTML5, CSS3, and JavaScript through hands-on projects and real-world scenarios.
- Applying object-oriented programming principles, backend integration, debugging, and performance optimization in structured development environments.

Research Intern – Manipal Institute of Technology

Development of Deep Learning Approaches at the Advanced Healthcare Lab

Manipal, KA

Jan 2025 – Mar 2025

- Implemented CNN-based models for Facial Emotion Recognition, achieving a 10% accuracy improvement over baseline methods.
- Conducted comparative analysis of hybrid architectures (CNN + HOG), improving real-time facial emotion recognition accuracy by 12% for healthcare applications.

Projects

Inventory Management System

- Built a MERN stack inventory system for real-time product tracking, order management, and supplier coordination.
- Designed separate dashboards for admins and customers, simplifying task management.

A Hybrid Deep Learning Framework for Multimodal Emotion Recognition Using EEG and Facial Expressions

- Extracted RFFT-based features from EEG (Electroencephalography) signals and fused them with facial expression data for multimodal emotion analysis.
- Built an LSTM model in TensorFlow to learn temporal patterns and improve overall emotion recognition accuracy.

Skills

Programming Languages: Java, JavaScript, Python

Web Technologies: HTML5, CSS3, Node.js, REST API

Frameworks / Libraries: React.js, Express.js, Tailwind CSS, Bootstrap, TensorFlow, Scikit-learn

Databases: MongoDB, SQL

Tools / Editors: GitHub, Visual Studio Code, Jupyter Notebook

Soft Skills: Teamwork, Problem Solving, Adaptability, Communication, Time Management

Achievements

- Paper titled "Emotion Recognition from EEG Signals Using RFFT-Based Features and LSTM Networks" accepted for presentation and publication in the Scopus-indexed Springer Book Series at CSCT 2025, NIT Sikkim.

Additional

Languages Known: English, Hindi, Kannada, Telugu, Tulu
